

To Whom it May Concern at the FCC:I oppose any legislation that limits my right to acquire and gain information which I deem essential to me. XM instant traffic and weather is a service that I look forward to being able to avail myself. I am a paid subscriber to this service, and it is often my sole source of this information. I travel to areas that have limited signals from radio transmissions. I am often unable to tune to these services other than on my XM Radio receiver.

I see NO reason that is legitimate on its face, to limit XM or its subscribers in the services they want and need.

Please reject NAB's petition 04-160. DO NOT RESTRICT FREEDOM OF CHOICE AND UNFAIR PRACTICES CONCERNING NORMAL COMPETITIVE ALTERNATIVES.

Sincerely, Lawrence Fine, Registered Voter.
